INTRODUCTION AND CONSENT

(1)

Hello. My name is _____. I am working with [NAME OF ORGANIZATION]. We are conducting a survey about health and other topics all over [NAME OF COUNTRY]. The information we collect will help the government to plan health services. Your household was selected for the survey. The questions usually take about 30 to 60 minutes. All of the answers you give will be confidential and will not be shared with anyone other than members of our survey team. You don't have to be in the survey, but we hope you will agree to answer the questions since your views are important. If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time.

In case you need more information about the survey, you may contact the person listed on the card that has already been given to your household.

Do you have any questions?
May I begin the interview now?

SECTION 3. FOOTNOTES

- (1) Studies have indicated emergency contraception can be effective up to five days. Verify country program recommendations and modify wording if appropriate.
- (2) The Standard Days Method (SDM) should be deleted in countries that do not have a SDM program. In these countries, SDM should also be deleted as a coding category in Qs. 304, 315, 317, 324, and Column 1 of the calendar.
- (3) The LAM method should be deleted in countries that do not have a LAM program. In these countries, LAM should also be deleted as a coding category in Qs. 304, 315, 324, and Column 1 of the calendar.
- (4) Other commonly used methods may be added to the list, such as contraceptive patch, contraceptive vaginal ring, or sponge. Any codes added in Q. 304 must also be added to Qs. 315, 317, 324, and Column 1 of the calendar. These methods should not be added to Q. 301.
- (5) Coding categories to be developed locally; however, the broad categories must be maintained. Additions to the codes under the private medical sector heading may include religious affiliated sources and NGO sources.
- (6) If the survey will be conducted using paper questionnaires, delete 311-312I under CAPI OPTION. If the survey will be conducted using CAPI, delete 311-312 under PAPER OPTION.
- (7) Year of fieldwork is assumed to be 2015. For fieldwork beginning in 2016, all references to calendar years should be increased by one; for example, 2009 should be changed to 2010, 2010 should be changed to 2011, 2011 should be changed to 2012, and similarly for all years throughout the questionnaire.
- (8) In countries without national fieldworker programs that include family planning, Q. 327 and 328 should be deleted.

SECTION 4. FOOTNOTES

- (1) Year of fieldwork is assumed to be 2015. For fieldwork beginning in 2016, all references to calendar years should be increased by one; for example, 2009 should be changed to 2010, 2010 should be changed to 2011, 2011 should be changed to 2012, and similarly for all years throughout the questionnaire.
- (2) Coding categories to be developed locally; however, the broad categories must be maintained. Additions to the codes under the private medical sector heading may include religious affiliated sources and NGO sources.
- (3) Vaccination practices may vary; this question should specify where the injection is given, e.g. arm or shoulder.
- (4) Syrup should be deleted in countries where syrup is not used.
- (5) In countries where it is important to know the number of iron tablets taken per day, an appropriate question may be added.
- (6) The question should be deleted in surveys in countries where there is no program for deworming.
- (7) The question should be deleted in surveys in countries where there is no program for intermittent preventive treatment against malaria during pregnancy.

SECTION 5A AND 5B. FOOTNOTES

- (1) Year of fieldwork is assumed to be 2015. For fieldwork beginning in 2016, all references to calendar years should be increased by one; for example, 2009 should be changed to 2010, 2010 should be changed to 2011, 2011 should be changed to 2012, and similarly for all years throughout the questionnaire.
- (2) Replace the word 'card' with the term used locally to refer to the official vaccination record for the child, such as 'mother and child booklet'.
- (3) The questionnaire should look like the vaccination card in the country. Obtain current or recent vaccination cards from the national immunization program. Add yellow fever, rubella, inactivated polio vaccine (IPV), or any other vaccine recommended in the country for children under age 3. Delete any of these vaccinations that are not included in the country's vaccination schedule. Consult with the EPI program in the country to verify the questionnaire reflects the correct vaccination card.
- (4) Delete in countries where polio 0 (polio at birth) is not part of the immunization schedule.
- (5) Adapt question locally to follow national immunization schedule. If DPT, Hep. B and Hib are given separately, provide separate entries for the recommended number of doses of each.
- (6) If vaccination schedule only uses two doses of vaccine, remove 3rd entry.
- (7) Adapt question locally to use the name of the measles containing vaccination (MCV) used in the country: measles, MMR, or MR.
- (8) If vaccination schedule only uses one dose of vaccine, remove 2nd entry.
- (9) Filter should reflect the vaccination list on the card (excluding vitamin A, which is not a vaccination).
- (10) Change the wording of this question to match the names used for supplemental immunization activities in the country.
- (11) Adapt question locally after determining the most common injection site. For example, pentavalent may be given in the left outer thigh, and pneumococcal in the right outer thigh.
- (12) Delete this question in countries where the vaccination schedule includes only one dose of measles containing vaccination.

- (1) Year of fieldwork is assumed to be 2015. For fieldwork beginning in 2016, all references to calendar years should be increased by one; for example, 2009 should be changed to 2010, 2010 should be changed to 2011, 2011 should be changed to 2012, and similarly for all years throughout the questionnaire.
- (2) The question should be deleted in surveys in countries where there is no program for deworming.
- (3) The term(s) used for diarrhea should encompass the expressions used for all forms of diarrhea, including bloody stools (consistent with dysentery), watery stools, etc.
- (4) Coding categories to be developed locally; however, the broad categories must be maintained. Additions to the codes under the private medical sector heading may include religious affiliated sources and NGO sources.
- (5) Include in the question the common names/brands for pre-packaged ORS liquids. If pre-packaged ORS liquids are not available in the country, this item should be deleted.
- (6) This item should be adapted to include the terms used locally for the recommended home fluid. The ingredients promoted by the government for making the recommended home fluid should be reflected in the category. If the government does not recommend a homemade fluid, then the word "government" should be dropped from the question.
- (7) The question should be deleted in countries that are not affected by malaria.
- (8) Coding categories to be developed locally and revised based on the pretest. All antimalarials commonly used in the country should be included in the response categories. Common brand names of drugs, such as Bayer, Tylenol or Paracetamol, should be added to the response categories for aspirin, acetaminophen, or ibuprofen as appropriate.
- (9) Delete "OR PRE-PACKAGED ORS LIQUID" in countries where such liquid is not available.
- (10) A separate category: "Foods made with red palm oil, palm nut, or palm nut pulp sauce" must be added in countries where these items are consumed. A separate category: "Grubs, snails, insects or other small protein food" must be added in countries where these items are eaten. Items in each food group should be modified to include only those foods that are locally available and/or consumed in the country.
- (11) In the case of fortified foods, the interviewer should ask to see the package and/or brand label (if available) to confirm that the food is fortified.
- (12) Grains include millet, sorghum, maize, rice, wheat, or other local grains. Start with local foods, e.g. ugali, nshima, fufu, chapati, then follow with bread, rice, noodles, etc.
- (13) Items in this category should be modified to include only Vitamin A rich tubers, starches, or red, orange, or yellow vegetables that are consumed in the country.
- (14) These include cassava leaves, bean leaves, kale, spinach, pepper leaves, taro leaves, amaranth leaves, or other dark green, leafy vegetables.

(1) If Qs. 1003,1005, and/or 1006 do not apply to the local context, replace the question using a specific local misconception. At least two questions related to misconceptions are needed.

(2) The question may be considered for deletion in countries with a very low HIV prevalence.

(3) Year of fieldwork is assumed to be 2015. For fieldwork beginning in 2016, all references to calendar years should be increased by one; for example, 2009 should be changed to 2010, 2010 should be changed to 2011, 2011 should be changed to 2012, and similarly for all years throughout the questionnaire.

(4) Coding categories to be developed locally; however, the broad categories must be maintained. Additions to the codes under the private medical sector heading may include religious affiliated sources and NGO sources.
